PROFILE

Final-year (fifth-year) Artificial Intelligence engineering student seeking a final-year project internship (PFE) starting February 1, 2027. Interested in designing, training and deploying AI solutions to analyze data, automate processes and address practical business needs. Experience in software development, automation and IoT.

PROFESSIONAL EXPERIENCE

4D Business Consulting (4DBC) — Software Development & IoT May – Jul. 2025
KSF Space team, Venezuela · Remote

- Contributed to CubeSat telemetry processing and visualization software, turning raw data into actionable information for monitoring and analysis.
- Participated in hardware/software integration, testing and validation; software and firmware development using LoRa, MQTT and UART protocols.

Atner — Application Development & Automation Apr. 2023 – Jun. 2024
Rabat, Morocco

- Developed internal HR tools and automated document processing; contributed to an accounting application to help identify and track financial bottlenecks.
- Automated purchase tracking from suppliers to construction sites using PowerShell, Sage and Excel, improving traceability and project monitoring across departments.

Afrogotech — Web & Mobile Development Dec. 2022 – Feb. 2023
Rabat, Morocco

- Developed and deployed the company website and a mobile fleet management application for fuel monitoring, speed tracking and vehicle start/stop control; processed and presented API data.

EDUCATION

ISMAGI — State Engineering Degree in Artificial Intelligence Oct. 2025 – Jul. 2027
Rabat, Morocco · In progress; expected graduation: July 2027

ISMAGI — Professional Bachelor's Degree in IoT & Intelligent Systems Oct. 2024 – Jul. 2025
Rabat, Morocco

OFPPT NTIC — Specialized Technician Diploma in Software Development Sep. 2020 – Jul. 2022
Rabat, Morocco

ARTIFICIAL INTELLIGENCE PROJECTS

Driver Fatigue Detection System Patent application filed: OMPIC, 2025, No. 72322

- Designed a multimodal embedded system combining camera-based eye closure and yawning detection with a heart rate sensor; fused data to compute a real-time fatigue score.
- Implemented audible and visual alerts, offline operation and optional remote transmission. Python, OpenCV, dlib, Raspberry Pi, sensors.

Medical Image Analysis & Physiological Monitoring AI · Computer Vision · IoT

- Developed five-class ocular classification with ResNet18 (PyTorch) and skin condition classification with EfficientNetV2-S (TensorFlow/Keras); transfer learning, data augmentation, evaluation and ONNX export.
- Contactless heart rate and heart rate variability estimation (SDNN, RMSSD) using facial video rPPG; Raspberry Pi 5, server and Flutter architecture, federated learning (FedAvg).

Calories Tracker — Food Recognition Android · AI

- Calorie tracking application using meal photos; classified 101 food categories with EfficientNetV2-B0 (TensorFlow/Keras). Java, Android, Python, FastAPI.

TECHNICAL SKILLS

AI & Data: Machine Learning, Deep Learning, NLP/NLU, RAG, reinforcement learning, federated learning, MLOps, data science, data visualization, computer vision and image processing.

Algorithms & Architectures: Regression, SVM, k-NN, decision trees, Random Forest, XGBoost, k-means; CNN, ResNet, EfficientNet, RNN/LSTM, Transformers, YOLO, FedAvg.

Libraries: NumPy, pandas, Matplotlib, scikit-learn, PyTorch, TensorFlow/Keras, XGBoost.

Development: Python, Java, JavaScript, HTML/CSS, React, Next.js, Django, FastAPI, Node.js, Express.js; object-oriented programming, distributed systems, REST/SOAP APIs.

IoT & Tools: Arduino, ESP32, Raspberry Pi, VHDL; LoRa, Wi-Fi, BLE, I²C, UART, MQTT; Git, Docker, PowerShell, Sage ERP, Excel, Agile/Scrum.

LANGUAGES

Arabic: Native · French: Professional proficiency · English: Professional proficiency
